**Product description**

The name of the Centifolia rose comes from Latin and means “a hundred leaves”, which corresponds to the numerous petals the blossom of this kind has. The Centifolia rose boasts not only its beautiful blooms but also a rich and complex aroma. Its scent is sweet with rich honey and jamlike red berry nuances. Sensual and intensely floral, this aroma represents the elegance of eternal femininity. It is not a coincidence that Centifolia rose oil is a very cherished ingredient in many classy perfumes.

Alteya Organics pure and organic Centifolia Rose Water is made from fresh Centifolia rose blossoms carefully picked by hand early in the morning, when they are still cool from the night and the first rays of sunlight unveil their fragrance. This rose water gently helps tone, soften and soothe skin. Thanks to its tightening and toning effect, it assists in minimizing the appearance of pores and superficial capillaries. By delivering a healthy boost of moisture and essential micronutrients, it promotes a dewy complexion and naturally fresh, youthful appearance.

Use: Apply gently with a cotton ball onto the face and neck, or close eyes and mist after cleansing. Reapply any time of the day to hydrate and refresh skin or to set makeup.

Mist over the entire body to freshen up any time for a splash of gentle aroma. Massage the roots of washed hair or use it as an invigorating hair rinse.
