Description

Pine water is an all-natural product obtained by steam distillation of the needles and twigs of the white pine *Pinus Silvestris*.

It has a pleasant forest aroma and a slightly tart taste. This makes it an extremely suitable ingredient in the preparation of perfumes, aromatherapy compositions, relaxing massage blends or refreshing room fragrances.

It has a toning, cleansing and antiseptic effect. For this reason, pine water can be used for skin irritations, itching, disinfection of injuries and cuts.

In aromatherapy, pine water is used for its invigorating effect. Refreshes the mind and aids concentration.

Its characteristic aroma leaves a purifying sensation.

Combines well with oils or floral waters of cedar, rosemary, lavender, sage and juniper.

In ancient times, pine water was one of the significant medicinal remedies for the treatment of coughs and bronchitis.

Pine water is used in making various cosmetic products and helps treat skin problems by curing hair loss.

Usage:

Apply with light massage movements on the face and certain parts of the body. It is used as an ingredient in homemade cosmetic products.

It can also be used as a room air freshener and to scent clothes.

In case of eye problems and severe fatigue, 1-2 drops of pine water are dropped into the eye and the tension subsides in seconds.

Storage:

In a dark and cool place, away from direct sunlight and heat sources. To keep away from children.

Ingredients: 100% natural pine water
